

# GahannaNet

Premium Fiber Network Services

## Announcing the latest in technology in Gahanna

Introducing GahannaNet – a public-private partnership that brings tier 1 broadband (the ‘new’ utility) and the latest technology advances to you and your business. Through a partnership with Bluemile, the fiber-optic network enables existing Gahanna businesses and future businesses locating to Gahanna to connect to multiple carriers nationwide.

## Businesses of all types and sizes can benefit

If your business has multiple employees and/or multiple locations, growth or expansion needs, large call volumes or call centers, data centers, or a need for storing or transporting large amounts of data electronically – you may be able to benefit from using GahannaNet services.

## Costs associated with GahannaNet services

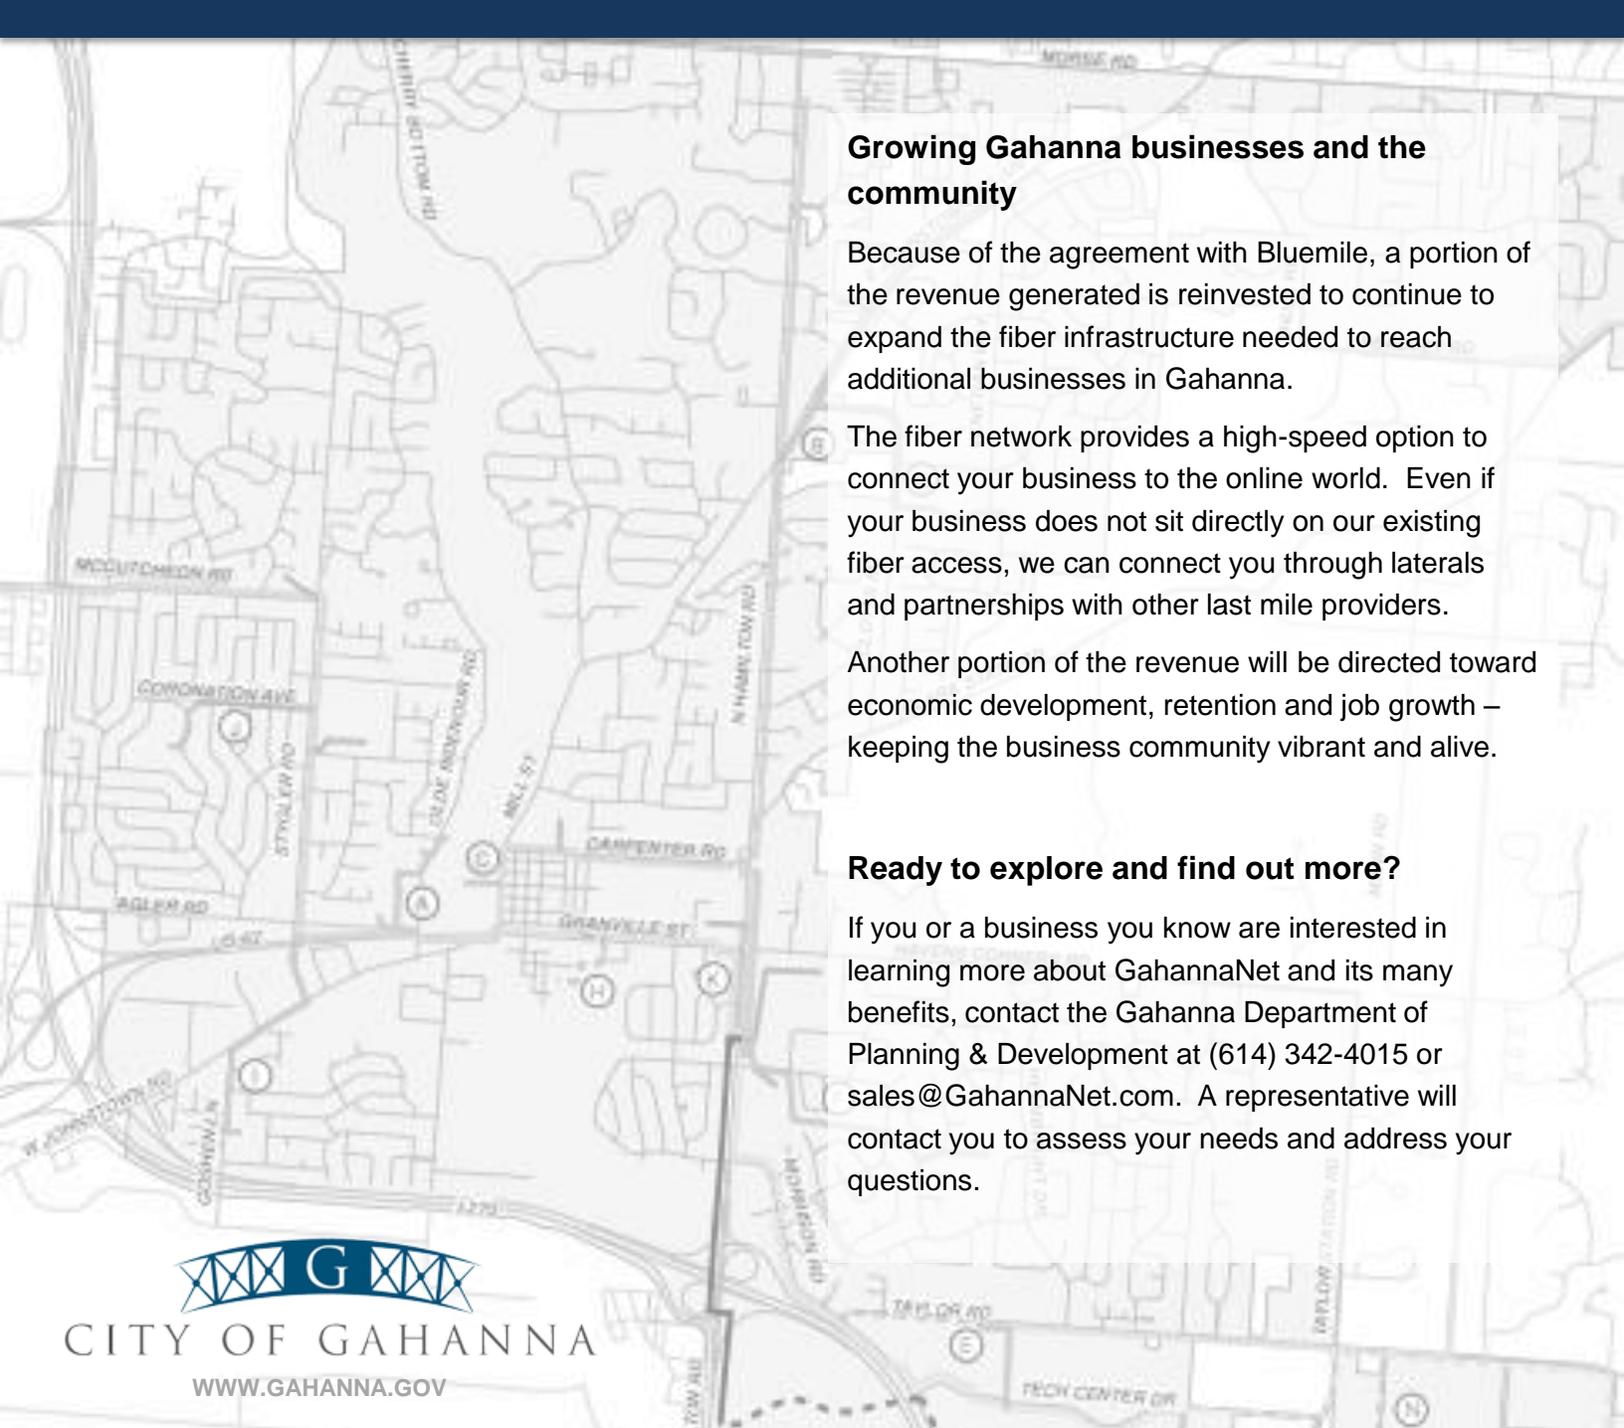

The flexibility of the network allows individual businesses to tailor a plan for their particular needs. The costs associated with utilization of GahannaNet services vary depending on need and usage. A Bluemile representative will explore your business needs and provide a customized proposal for services.

## Benefits for your business

- Reduce operating costs on an ongoing, long-term basis
- Increase internet bandwidth for faster and better business efficiency
- Obtain greater access to new technology and cloud-based services
- Connect multiple business locations at below market rates
- Improve data storage, security and redundancy
- Integrate seamlessly with your existing network
- Access technology infrastructure for existing and start-up businesses

GAHANNA  
COMMUNITY IMPROVEMENT  
CORPORATION

## Growing Gahanna businesses and the community

Because of the agreement with Bluemile, a portion of the revenue generated is reinvested to continue to expand the fiber infrastructure needed to reach additional businesses in Gahanna.

The fiber network provides a high-speed option to connect your business to the online world. Even if your business does not sit directly on our existing fiber access, we can connect you through laterals and partnerships with other last mile providers.

Another portion of the revenue will be directed toward economic development, retention and job growth – keeping the business community vibrant and alive.

## Ready to explore and find out more?

If you or a business you know are interested in learning more about GahannaNet and its many benefits, contact the Gahanna Department of Planning & Development at (614) 342-4015 or [sales@GahannaNet.com](mailto:sales@GahannaNet.com). A representative will contact you to assess your needs and address your questions.

## PRODUCTS AND SERVICES

**Business Class Internet Transport** – Business class internet and circuit services offered through Gahanna provide high bandwidth, dark fiber transport services to get you connected. Let's discuss building fiber into your business in order to access the internet, your other business locations (MPLS), or one of the other services listed below.

**Dial Tone** - For medium and large businesses, we offer competitively-priced dial tone via SIP voice services for businesses with existing VOIP call manager systems and large call volume needs.

**Cloud Computing** – The City provides businesses with access to high-quality datacenter services. Contact us to discuss moving your IT infrastructure to the cloud and for a free demo of our datacenter services. Give your business the technology and availability it needs.

**Backup and Disaster Recovery Services** – With GahannaNet, you can protect your business critical systems with disk-based off-site backup. If something goes wrong with your systems on-site, you can restore all your information over the internet.
